ABOUT THE CONFERENCE

Global business practices have undergone various Changes over the last century such as a Change from push to pull business models, from efficiencies of economies of scale through ownership of capital assets to effectiveness through agility and shared resources, from universal to unique viz. from mass production to tailored and individualized offerings. Change management incorporates the organizational tools that can be utilized to help individuals make successful personal transitions resulting in the adoption and realization of change. Dealing with inevitable change in an organization typically involves transitioning to a new way of working. Change in the workplace can be intimidating and stressful, frequently because of the uncertainty associated with new situations. Whether managing large-scale change or simple alterations to policies and procedures, if you prepare adequately and communicate effectively, you can help yourself and others accept change with minimal disruption. When you manage change effectively, you can move your organization into the new "business as usual" situation rapidly. It is found that other people are quicker to accept change than you would think. This, of course, is good news for your team and organization to experience minimum disruption, and successful projects throughout the change process.
